Tomb Raider II was one of the very first video games I've ever played. I unknowingly played the demo and when it ended and I realized I didn't have the whole game I was heartbroken - but I'll never forget putting the butler in the freezer! Lara Croft will always hold a special place in my heart. She is both badass and a babe, my favorite combo to draw. My inspiration for this piece was a mixed of the old cover art with my own personal style! I kept a simplistic background and similar character cropping but added her iconic red sunglasses for extra flair. I updated the logo and dragons with a neon treatment to both fit my style and make them feel a bit more modern. I hope everyone has as much fun seeing it as I did creating it!
